

ISD Secondary COVID 19 Measures and Regulations

Ventilation

Over the summer period, all school buildings within the Stichting Lucas Onderwijs have gone through a thorough professional inspection of the ventilation systems. We are pleased to report that our school building has passed this inspection and is deemed safe.

All areas in our school building are continuously ventilated.

Traveling and returning from orange / red countries

When you return from an orange / red country (list with colour status of countries:

<https://www.nederlandwereldwijd.nl/reizen/reisadviezen>) you are asked to **home**

quarantine for 10 days and inform the school asap, via email:

admin@internationalschooldelft.org or telephone: 015 – 820 02 08.

Mild symptoms

- When you have mild symptoms (cold, runny nose, sore throat) stay home and get tested at one of the GGD points. Notify the school via email or telephone when your child is not coming to school due to sickness.
- When one person in the household tests positive, everyone in the household stays home.

Follow hygienic rules

The RIVM guidelines, with regards to hygiene, are still in place: Wash hands regularly, clean the tables after usage, cough sneeze in your elbow and use paper tissues. The school will provide enough cleaning wipes, paper towels and hand sanitizer, so everyone can adhere to these rules.

Additionally, students need to use their own equipment (pens, papers) and bring in their own water bottle.

Distance rule

Students do not have to stay 1.5 metres apart from each other, but they do need to keep their distance from teachers and other adult members of staff. We have put in place a circulation system in the school in order to minimize the congestion in hallways and corridors.

Mouth masks

Mouth masks are not obliged to be used within the school building. However, if students would feel safer and want to wear a mouth mask, we respect this decision. For lessons such as design and science, our teachers will have access to mouth masks, as these lessons may sometimes require a teacher to come within 1,5 meter distance.
